DETAILED ACTION

Applicants are requested to submit any PCT or foreign search reports.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1--16, drawn to a method for analysis of a small molecule.

Group II, claim(s) 17-25, drawn to a method for performing cell lysis.

Group III, claim(s) 26-31, drawn to a kit for performing cell lysis.

Group IV, claim(s) 32-38, drawn to a method for electrophoretically isolating a small molecule from a sample.

Group V, claim(s) 39-45, drawn to a kit for performing electrophoresis on a sample.

Group VI, claim(s) 46, drawn to a method of solubilizing a small molecule.

Group VII, claim(s) 47, drawn to a method of regenerating a liquid chromatography column.

Group VIII, claim(s) 48-51, drawn to a method for analyzing a small molecule contained in a cell.

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1657

The common technical feature of all the Groups is the surfactant. The same surfactant is taught in Piasecki (J of Surfactants and Detergents) entitled "Synthesis and Surface Properties of Chemodegradable Anionic Surfactants" which teaches the same surfactant compounds as presently claimed.

The invention is drawn to a plethora of different compounds. The compounds vary distinctly in their structures and functions. Thus, an individual search is required of each individual compound. Therefore, as part of electing one of the groups as the elected invention, Applicant is also required to elect a specific compound, to which the elected invention will be examined on the merits as drawn to; as well as identifying those claims to which the elected compound is drawn. This requirement is not to be taken as an election of species, but rather as an election of a single invention, since each compound is assumed to be a patentably distinct invention, in the absence of evidence to the contrary.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1657

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ralph Gitomer whose telephone number is (571) 272-0916. The examiner can normally be reached on Monday - Friday.
